

EYEWEAR RETENTION SYSTEM

Abstract of the Disclosure

Disclosed is an eyewear retention system, which extends across the top of the wearer's head for supporting at least one lens in the wearer's field of view. The retention system includes at least a first and a second support component, which are spaced apart laterally from each other along at least a portion of the eyewear system. The system may include any of a variety of electronics, including telecommunications receivers, transmitters, electronic storage devices, and head-up display driving circuitry.
